The good news about all this is
the financial boost all this will
give our "medical/pharmaceutical
industry," right? KE.

Dear Dr. Henney,

I believe that genetically engineered food ingredients or crops should not be
allowed on the market unless:

- 1) Independent safety testing demonstrates they have no harmful
effects on human health or the environment,
- 2) They are labeled to ensure the consumer's right-to-know, and
- 3) The biotechnology corporations that manufacture them are held
responsible for any harm.

I ask that the FDA's current policies be changed, and I support the points in
Docket #00P-1211/CP1.

Sincerely,
